

# “Traffic Light” Analysis

Detailed analysis using a clear and simple scoring system. Good for comparative data analysis. Printed on A3 and A4.

2005

# How to interpret the scores

*These are mean scores of all responses to the question. So if, for example, everyone strongly agreed with the statement the score would be 30; if they all disagreed strongly, it would be -30. If half agreed and half disagreed, the score would be 0.*
